

March 23, 2020

All Caret Health Team Members:

San Antonio has declared a shelter-in-place directive, and we expect Albuquerque (and likely Portland) to follow. **Due to our function as an essential healthcare organization, Caret will remain open, and you should continue to report to your assigned work site.**

We are aggressively working on our transition to work-at-home for as many team members as possible. In the meantime, you have our assurance that we are continuing the heightened disinfecting procedures and CDC guidelines, to provide you with a safe workplace.

Please reach out to your manager with any questions.

Important! Please keep this information on your mobile device or print it out to keep with you. This email will serve as verification that you work for an essential healthcare employer and are exempt from sheltering in place.

Thank you.

Mick Mazour – President
